

Algorithm Analysis & Design

AlgoMon

-A discord bot to help you through your journey to mastering algorithms

Team Members :

1) Name : Keyur Ganesh Chaudhari ,Roll no: 2020101100

2) Name : Aryan Gupta , Roll no: 2020101091

The submission consists of:

- Code for the 2 discord bots: 1 for management and other for quiz.
- Webpages of all the articles and content we wrote.
- Source code for the main page of algoMon

1. The first bot is hosted on replit.com. The source code has an empty variable “BOT_TOKEN” which can be changed to run the code through any bot.

2. The second bot is to be hosted locally by running the run.sh script.

3. The website is hosted here -> <https://keyurchd11.github.io/>

4. The individual webpages for all the content written is available as web pages in the “StudyMaterial” directory.

5. The questions used for the quiz bot are available in the “Questions” subdirectory in TriviaBot.
